

SOAR for STEM Program Family & Guardian Flyer

Dear Parent or Guardian,

Your child recently visited the New England Air Museum as part of the SOAR for STEM program. The New England Air Museum is an independent non-profit organization dedicated to preserving our region's aerospace history and inspiring the next generation of aerospace innovators. Home to over 100 historic aircraft, NEAM is the largest aerospace museum in New England, and our SOAR for STEM program uses those aircraft to bring STEM curriculum, aviation science, and local/regional history life for students in grades 3-8. This program is offered to local schools at no cost thanks to generous sponsorship by donors, corporations, and foundations.

As part of this year's SOAR for STEM program, your child received a complimentary admission pass to return to the museum with a parent or guardian. This pass does not expire, has no cash value, and is valid during regular business hours. Directions to the museum, as well as museum business hours and a list of upcoming special events can be found on our website: www.neam.org.

If you have any questions about the SOAR for STEM program, please do not hesitate to contact me directly. Otherwise, we look forward to hosting you and your child at the museum in the future!

Sincerely,

Amanda Goodheart Parks, Ph.D.
Director of Education
